Reports and Discussions

JACQUES SOLVAY: The Solvay Conferences and the International Cooperation in Science 1

EDOARDO AMALDI: The Solvay Conferences in Physics 7

A. R. UBBELOHDE: The Solvay Conferences in Chemistry, 1922–1976 37

I. PRIGOGINE: Nonequilibrium Thermodynamics and Chemical Evolution: An Overview 43

MARCEL NICOLET: Atmospheric Chemistry 63

R. ZANDER: Commentary: Observational Aspects Related to the Chemical Evolution of Our Atmosphere 79

STANLEY L. MILLER: The Prebiotic Synthesis of Organic Molecules and Polymers 85

PETER SCHUSTER: Commentary: On The Origin of Optical Activity 109

RICHARD M. NOYES: Commentary: On Selection of Chirality 111

C. SYBESMA: Commentary: A Prebiotic Origin of Photosynthesis? 113

MANFRED EIGEN: The Origin and Evolution of Life at the Molecular Level 119

ROBERT M. BOCK: Commentary: On Paper by Manfred Eigen 139

J. W. STUCKI: Optimization of Mitochondrial Energy Conversions 141

JOHN ROSS AND PETER H. RICHTER: Commentary: Dissipation Regulation in Oscillatory Reactions. Application to Glycolysis 169

E. SCHOFFENIELS: Commentary: A Complex Biological Oscillator 171

G. NICOLIS: Bifurcations and Symmetry Breaking in Far-from-Equilibrium Systems: Toward a Dynamics of Complexity 177

H. L. FRISCH: Commentary: Stochastic Models of Synthesis of Asymmetric Forms 201

JACK S. TURNER: Complex Periodic and Nonperiodic Behavior in the Belousov–Zhabotinski Reaction 205

STUART A. KAUFFMAN: Bifurcations in Insect Morphogenesis 219

R. THOMAS: Logical Description, Analysis, and Synthesis of Biological and Other Networks Comprising Feedback Loops 247
